NEW COURSE ON HUMAN BEHAVIOR AND WEATHER RESEARCH

Course: CE 491/591: Human Behavior Research for Engineering Operations and Applications (3 credit hours)
When: Spring 2021
Instructor: Dr. Laura Myers, Director of the Center for Advanced Public Safety
Description: Learn how to conduct and interpret human behavior research. Participate in a research project that combines human behavior research with structural and environmental engineering concepts, with a focus on the impacts of severe weather on infrastructure and the environment, and how humans mitigate and respond to such events.
